

Forced Entry And Rescue Equipment Set, Aircraft Crash

NSN: 4210-00-293-7664
LIN: H88468

System Description

The Engineer Equipment Set: Forced Entry & Rescue will provide a capability for personnel extraction from damaged/disabled vehicles during convoys, as a result of accident or attack. The set consists of metal cutting saws, jaws-of-life, hydraulic unit, prybars, hammers, pliers, metal cutters, and other tools in numerous boxes to be stowed on-board designated vehicles during convoy/movement operations. The tool set can also be used to effect entry into locked/blocked/partially demolished facilities and buildings.

This system is not currently in reset.
